

STEM Bundle

Key Concepts:

Math (Review & New Concepts)

Science

Design & Engineering

Hands-on Experiments

Class Time:

Group A

1:30 - 4:30

Group B

9:00 - 12:00

Group C

1:30 - 4:30

For those who are curious about the workings of the world, excited about discovery and innovation, and want a fun, hands-on summer experience, our STEM bundle offers students a thrilling, interactive program that strengthens **math and science knowledge and facilitates interest in technology and invention**. **Design projects** let students creatively apply their engineering skills, while **hands-on experiments** give them the freedom and agency to make their own inquiries, work with real scientific equipment, and arrive at answers through their own trials and calculations. Students also reinforce their math skills through review exercises — all in a structured, social classroom setting.
